Are you a practising artist ready to take on a rewarding and creative challenge?

Do you want to inspire and support young people with special educational needs to develop their artistic skills, fine motor abilities and creativity?

We are seeking an Artist-in-Residence to join our school and college community for the 2026-2027 academic year.

Each year, we welcome a new creative practitioner with a different specialism to work alongside and inspire our students. You will be our 10th Artist-in-Residence, joining a legacy that includes painters, a composer, textile artists, a puppeteer and a printmaker.

We welcome artists working in any medium, provided you bring a flexible, inclusive approach that can be adapted to meet the diverse needs and abilities of our students. Above all, we are looking for someone who can connect with and inspire neurodivergent young people.

About the Residency

This residency offers a unique opportunity to develop your artistic practice within a specialist SEN environment. You will have the time and space to experiment, collaborate and grow your work, while making a meaningful impact on students' wellbeing and creative development.

Key aspects of the role include:

- Working from an on-site studio, visible to students and staff, showcasing your practice and promoting the arts as both a career pathway and a fulfilling pursuit.
- Delivering 12 hours per week (full-time) of student facing sessions (1:1 and group work).
- Providing occasional staff training linked to your artistic specialism.
- Contributing to a dynamic and ambitious Creative Arts team, including involvement in events throughout the year.
- Delivering a final exhibition in Summer 2027, alongside contributing a legacy artwork to the school.

Your application should clearly outline your current and past artistic practice, as well as your proposed projects and goals for the residency.
